Gaiole tanning recipe is a **guarantee** for human health and the environment

We collaborate with our customers to develop **eco-friendly customized products**

We propose a **collaborative business model** with our suppliers and customers to maximize the potential of our products

We want to **meet the expectations of our stakeholders at 100%**

BIODEGRADABILITY MEANS:

- *Reduce the environmental impact of finished products*
- *Improve the quality of the waste to be disposed of*
- *Reduce the chemicals used in the tanning process*
- *100% metal free target for finished products*
- *Ecological products for the market*

The GAIOLE tanning system has obtained the **Blue Label and Green Label** certifications by passing all the laboratory tests required by the "Biodegradable Leather" protocol:

- Biodegradability test in waste water - UNI EN ISO 20136:2020
- Biodegradability test for composting - UNI EN 13432:2002; UNI EN ISO 14855-1:2013
- Disintegrability test - UNI EN ISO 16929:2021
- Ecotoxicity test - OECD 208:2006; UNI EN 13432:2002
